

## Java Script Date functions – Practice

Build a small JavaScript app that allows user to start and stop count down time. Counting down should start from **30**minutes and count down to **0** minutes

The timer should have a **start** and a **stop** button that allows user to **start/stop** the count down.

When user presses the **start** button, the count down starts counting from 30, 29, 28 .....till 0.

The timer should stop if user clicks the '**stop**' button.
